

280G Advisory & Execution

Will Your 280G Analysis Keep the Deal Moving or Create Last-Minute Friction?

280G rarely becomes a problem because of the rules themselves. It becomes a problem when analysis starts too late, data is incomplete, or transaction decisions have already been made.

Infinite Equity helps companies, investors, and advisors address 280G early and strategically so decisions stay informed, timelines stay intact, and transactions continue moving forward.

280G Support Built for Live Transactions

280G is more than a calculation exercise. It impacts executive outcomes, tax exposure, deduction limitations, shareholder considerations, and transaction flexibility.

Our team works alongside legal, tax, finance, HR, and deal teams in real time to deliver clear analysis, practical guidance, and execution support aligned to the pace of active transactions.

When to Engage

Best Timing: Immediately post-LOI or during diligence

Also Supporting

- Pre-transaction planning
- Late-stage issue resolution
- Shareholder vote support
- Reasonable compensation analyses
- Executive compensation scenario modeling

Practical 280G Support Through Deep Transaction Expertise

Practical Solutions Through Deep Expertise

Infinite Equity combines extensive technical knowledge with real-world implementation experience. Our solutions are grounded in practical experience, not just theory—ensuring your plans are both technically sound and operationally efficient.

Extensive Global Network

With coverage in over 100 countries, our services deliver precise compliance with local regulations, reducing risk and maximizing program effectiveness across global markets.

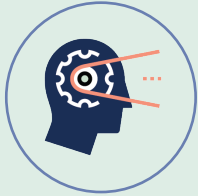

Flexibility to Meet Changing Regulations

As global tax and regulatory landscapes evolve, we proactively adjust your plans to maintain compliance, minimizing your administrative burden.

Why Work With Infinite Equity

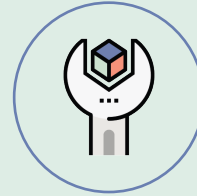

Boutique, High-Touch Transaction Support

Infinite Equity is structured to provide responsive, senior-level support for complex transactions operating under compressed timelines. Clients work directly with experienced advisors throughout the engagement process, allowing for efficient communication, practical guidance, and continuity from initial analysis through closing.

Responsive Under Active Deal Timelines

Transactions move quickly, and 280G issues often require real-time coordination across multiple stakeholders. Our approach is designed to support active diligence and closing processes with rapid turnaround, evolving analysis, and direct collaboration.

Integrated, End-to-End Support

We provide a single, coordinated workstream across: 280G calculations, non-compete valuation support, and shareholder vote coordination. This integrated approach helps reduce fragmentation across advisors and keeps transaction processes moving efficiently.

Practical, Deal-Focused Analysis

Our work is designed to support transaction execution and stakeholder decision-making, not simply deliver technical reports after key decisions have already been made. Outputs are structured for: legal review, executive and board discussions, transaction modeling, investor and diligence processes.

Direct Collaboration Across Deal Teams

We work closely with legal counsel, tax advisors, HR, finance, payroll, and executive stakeholders to help maintain alignment throughout the transaction lifecycle and support efficient execution through closing.

Keep 280G From Becoming a Closing Risk

280G moves at deal speed. So do we.
